

Example for the preparation of an abstract for IR-Colloquium 2009

M. Walther^{*,1}, O. Ambacher^{1,2}, and H. Schwörer¹

¹*Fraunhofer Institut for Applied Solid State Physics, Tullastr. 72, 79108 Freiburg, Germany*

²*Dep. of Microsystems Engineering-IMTEK, University of Freiburg, Georges-Koehler-Allee, 79110 Freiburg, Germany*

These instructions for authors should be read carefully. The document follows its own guidelines closely, but there are inevitably minor deviations between the different formats.

Please use Word 6 or later and ISO A4 (210 mm x 297 mm) size paper, making sure that text and other materials leave 2.5 cm margins on top/bottom/left/right. If you cannot set up for A4 or metric, use the 8 ½ x 10 inch North American standard and leave a 1 inch margin on top/bottom/left/right.

This document has been set up with a style sheet that should give the correct layout automatically. The title is in style 'Abstract-Title', authors' names are in style 'Authors', followed by the affiliation in style 'Affiliation'. The body of the text is written based on style 'text'. Please use these styles to the maximum extend possible. They include the spacing between different lines automatically, therefore it should not be necessary to add blank lines.

Please identify the corresponding author in the footnote of the first page with email address, phone and fax number.

The second page could be used for figures as well. No reference to the figure page should be made on the text page. Figures should be clearly labeled and captioned so that they can be understood independent of the text page. Both pages will be printed in the Book of Conference Abstracts.

Thank you very much for your cooperation.

Figures

Fig. 1. This is an example of a figure caption.
